

Que- Write down the command to insert the context in the existing file

Command: touch fileName.extension

Command: cat filename.extension

```
cloudera@quickstart: ~/sanju/sanjuSub
File Edit View Search Terminal Help
[cloudera@quickstart ~]$ touch hello.txt
[cloudera@quickstart ~]$ cat hello
cat: hello: No such file or directory
[cloudera@quickstart ~]$ cat hello.txt
[cloudera@quickstart ~]$ cat > hello.txt
Hello lpu
Here this is a file with the name of hello
^Z
[1]+  Stopped                  cat > hello.txt
[cloudera@quickstart ~]$ cat hello.txt
Hello lpu
Here this is a file with the name of hello
[cloudera@quickstart ~]$ pwd
/home/cloudera
```

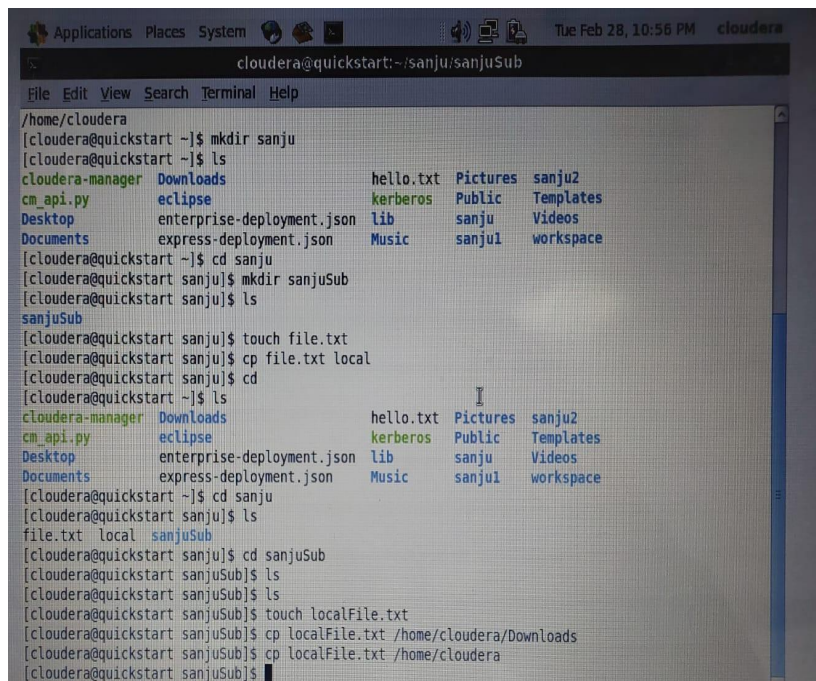

Q-2:

Commands

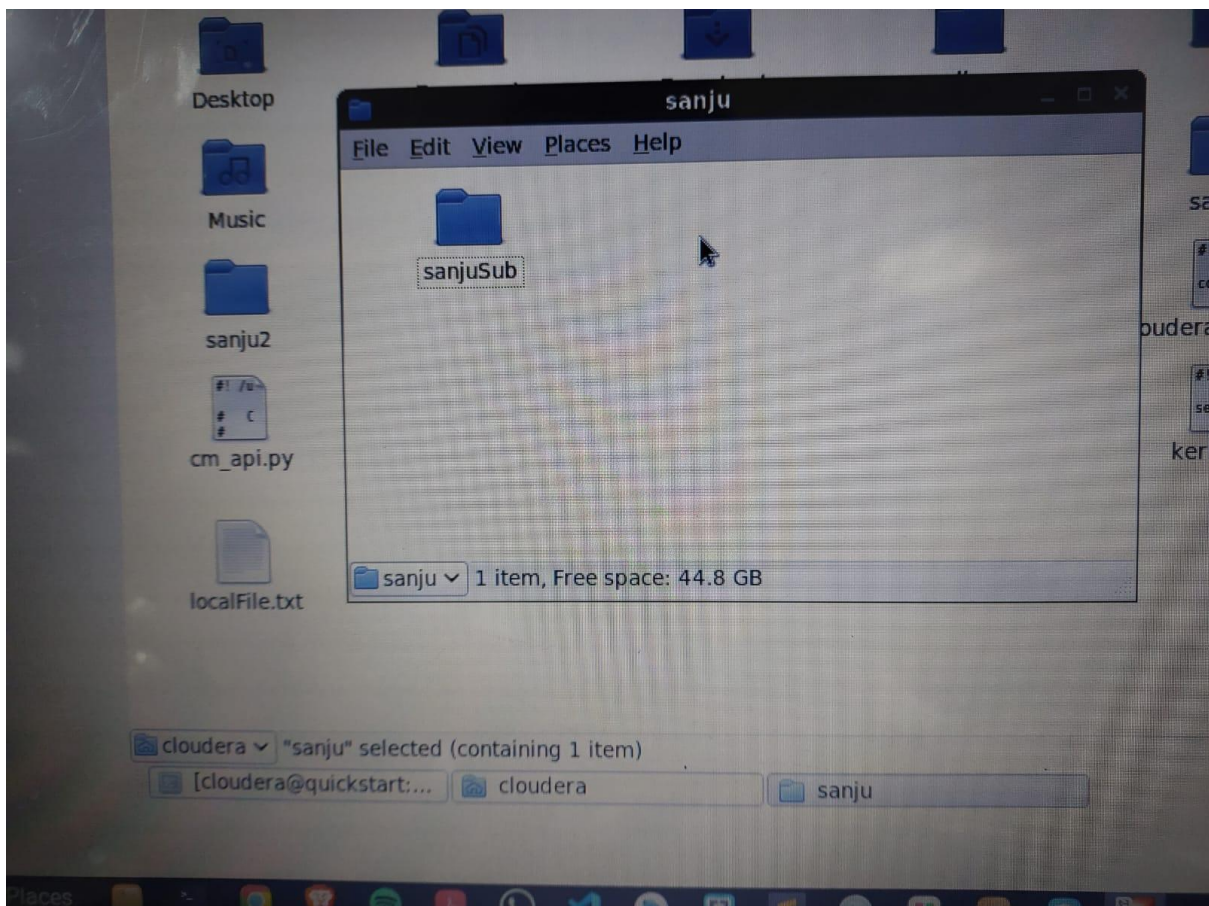

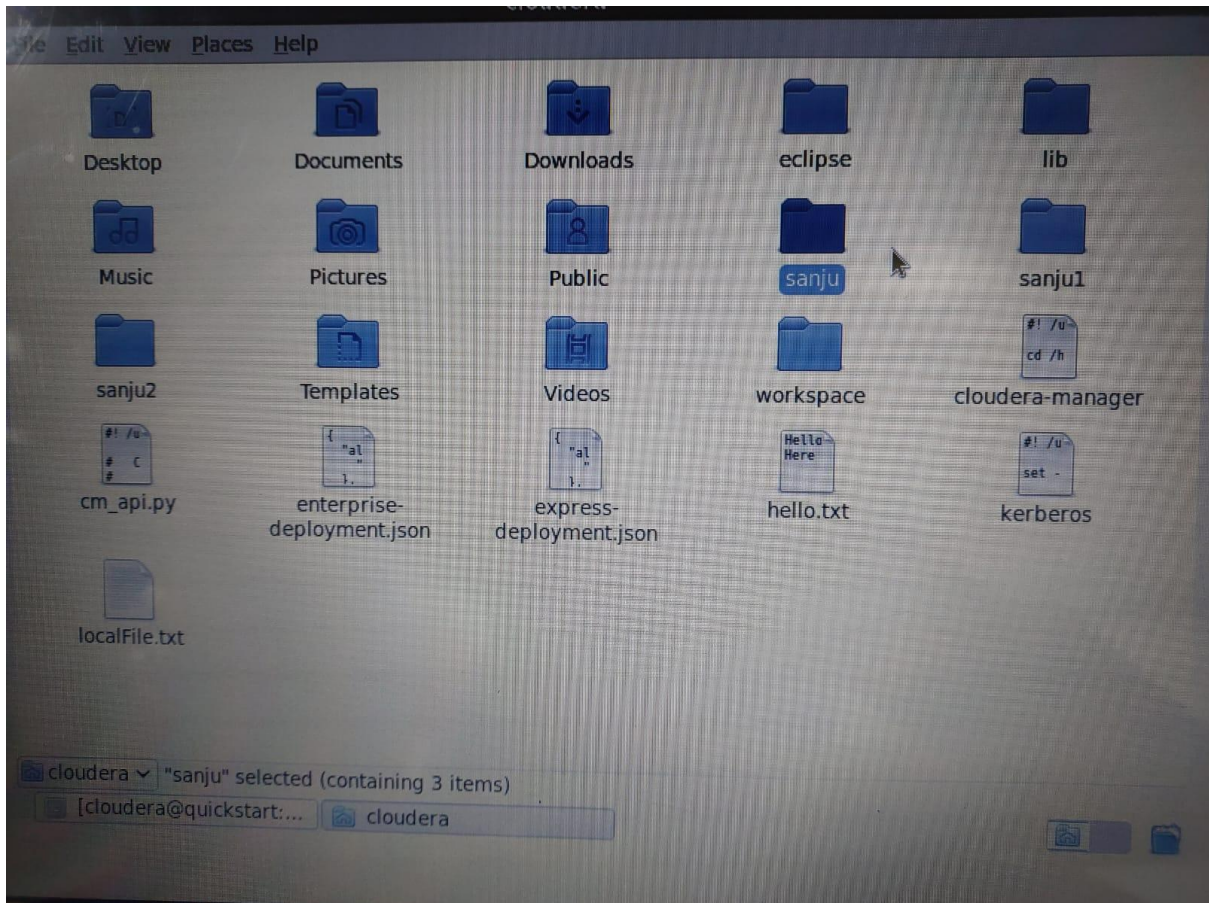

mkdir folderName

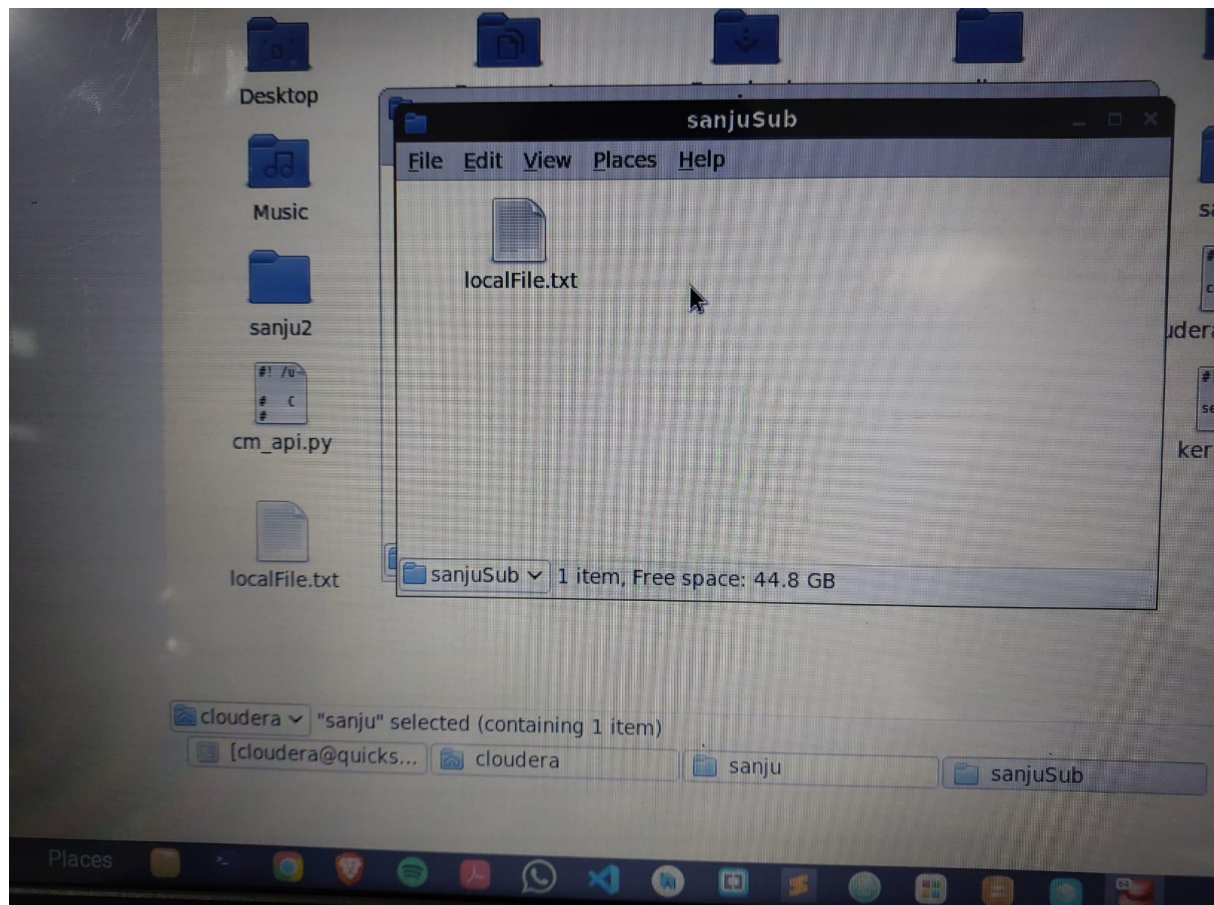

Mkdir subfolderName

Touch fileName.txt

```
cloudera@quickstart: ~/sanju/sanjuSub
File Edit View Search Terminal Help
/home/cloudera
[cloudera@quickstart ~]$ mkdir sanju
[cloudera@quickstart ~]$ ls
cloudera-manager  Downloads  hello.txt  Pictures  sanju2
cm_api.py         eclipse    kerberos   Public    Templates
Desktop          enterprise-deployment.json  lib        sanju     Videos
Documents        express-deployment.json    Music      sanju1    workspace
[cloudera@quickstart ~]$ cd sanju
[cloudera@quickstart sanju]$ mkdir sanjuSub
[cloudera@quickstart sanju]$ ls
sanjuSub
[cloudera@quickstart sanju]$ touch file.txt
[cloudera@quickstart sanju]$ cp file.txt local
[cloudera@quickstart sanju]$ cd
[cloudera@quickstart ~]$ ls
cloudera-manager  Downloads  hello.txt  Pictures  sanju2
cm_api.py         eclipse    kerberos   Public    Templates
Desktop          enterprise-deployment.json  lib        sanju     Videos
Documents        express-deployment.json    Music      sanju1    workspace
[cloudera@quickstart ~]$ cd sanju
[cloudera@quickstart sanju]$ ls
file.txt  local  sanjuSub
[cloudera@quickstart sanju]$ cd sanjuSub
[cloudera@quickstart sanjuSub]$ ls
[cloudera@quickstart sanjuSub]$ touch localFile.txt
[cloudera@quickstart sanjuSub]$ cp localFile.txt /home/cloudera/Downloads
[cloudera@quickstart sanjuSub]$ cp localFile.txt /home/cloudera
[cloudera@quickstart sanjuSub]$
```

Q-3

Command

cat fileName.extension

```
[cloudera@quickstart ~]$ cat hello.txt  
Hello lpu  
Here this is a file with the name of hello
```
