Modals

The Modal component is a dialog box/popup window that is displayed on top of the current page:

Example

```
<!-- Button to Open the Modal -->
<button type="button" class="btn btn-primary" data-bs-toggle="modal" data-bs-target="#myModal">
  Open modal
</button>

<!-- The Modal -->
<div class="modal" id="myModal">
  <div class="modal-dialog">
    <div class="modal-content">

      <!-- Modal Header -->
      <div class="modal-header">
        <h4 class="modal-title">Modal Heading</h4>
        <button type="button" class="btn-close" data-bs-dismiss="modal"></button>
      </div>

      <!-- Modal body -->
      <div class="modal-body">
        Modal body..
      </div>

      <!-- Modal footer -->
      <div class="modal-footer">
        <button type="button" class="btn btn-danger" data-bs-dismiss="modal">Close</button>
      </div>
```

Add animation

Use the `.fade` class to add a fading effect when opening and closing the modal:

Example

```html
<!-- Fading modal -->
<div class="modal fade"></div>

<!-- Modal without animation -->
<div class="modal"></div>
```

Modal Size

Change the size of the modal by adding the `.modal-sm` class for small modals (max-width 300px), `.modal-lg` class for large modals (max-width 800px), or `.modal-xl` for extra large modals (max-width 1140px). Default is 500px max-width.

Add the size class to the `<div>` element with class `.modal-dialog` :

Small Modal

```
<div class="modal-dialog modal-sm">
```

Large Modal

```html
<div class="modal-dialog modal-lg">
```

Extra Large Modal

```
<div class="modal-dialog modal-xl">
```

Fullscreen Modals

If you want the modal to span the whole width and height of the page, use the `.modal-fullscreen` class:

Example

```
<div class="modal-dialog modal-fullscreen">
```

Centered Modal

Center the modal vertically and horizontally within the page, with the `.modal-dialog-centered` class:

Example

```
<div class="modal-dialog modal-dialog-centered">
```

Scrolling Modal

When you have a lot of content inside the modal, a scrollbar is added to the page. See the examples below to understand it:

Example

```
<div class="modal-dialog">
```

However, it is possible to only scroll inside the modal, instead of the page itself, by adding `.modal-dialog-scrollable` to `.modal-dialog` :

Example

```
<div class="modal-dialog modal-dialog-scrollable">
```
