Dev Sanskriti Vishwavidyalaya Haridwar Uttrakhand.

Secondary & High School
2016- 2019
Chironji Lal Virendra Pal Saraswati Vidhya Mandir Pilibhit Up.

Projects

- **University App**
I developed this application in flutter using Firebase, Firebas Cloud & Data fetching from Internet (API).I developed this application in one month of internship for university with two more team members.

- **Password Manager**
This application is also developed in flutter. Basiclly i developed this application for my personal use. and this application saves the passwords.

- **Password Generator**
I developed this application when i was learning java so this application is developed in java and it generates random strong password as per your provided lengh of digits. i also used firebase authentication method to get login into the application.
